PROFESSIONAL SUMMARY

Software Engineer with 3.8+ years of professional experience at Infosys developing and managing enterprise-scale Java, Spring Boot, and micro services applications. Strong hands-on experience in REST APIs, Spring Data JPA, Spring Security, JWT authentication, AWS, DynamoDB, PostgreSQL, Elastic search, asynchronous processing, CI/CD, testing, and application performance optimisation. Experienced in designing scalable backend services, improving API performance by 40–50%, implementing search solutions for large datasets, and leading technical initiatives across development and testing. Seeking challenging Software Engineering opportunities across product and service organisations.

PROFESSIONAL EXPERIENCE

Infosys, Systems Engineer 09/2021 – 04/2025 | Hyderabad

Intel IPOS-Central Project

- **Performance Architecture:** Re-engineered backend data processing via parallel execution patterns, **slashing API response times by 40–50%** and increasing overall application throughput.
- **Micro services & gRPC Integration:** Architected and scaled **6–8 enterprise Java/Spring Boot micro services**; authored .proto definitions to establish high-speed gRPC service-to-service communication, **reducing network serialisation overhead**.
- **High-Volume Search System:** Combined Elastic search with Spring Boot and DynamoDB indexing to deliver **sub-second search and filtering across 1M+ data records**.
- **Asynchronous Message Queuing:** Implemented Amazon SQS to decouple micro services, **processing tens of thousands of background transactions daily** while ensuring system resilience and eventual consistency.
- **Security & Automated Quality:** Enforced JWT authentication via Spring Security and configured automated SonarQube code-quality gates, **maintaining clean build policies** and storing automated reports in Amazon S3.
- **Cloud Operations & CI/CD:** Utilised AWS CloudWatch to isolate performance bottlenecks; supported continuous deployment across **5 environments (Dev to Prod)** using Jenkins, Docker, Kubernetes (EKS), and AWS CodePipeline.
- **Testing & Recognition:** Executed Test-Driven Development (TDD) using JUnit and Mockito to achieve **85%+ test coverage**; earned **"Top Performer"** for technical execution and 100% on-time delivery.

Bulgarian Banking Project

- **API Development:** Designed **15+ core banking RESTful endpoints from scratch** using Spring Boot, Spring Data JPA, and PostgreSQL, **maintaining 100% SLA compliance and zero-defect delivery**.
- **Resource & Query Optimisation:** Replaced legacy iterative logic with functional Java Streams and optimised SQL query indexing, **reducing redundant database calls and cutting CPU/memory overhead by ~25%**.
- **Automated Testing & Reliability:** Formulated comprehensive unit and integration test suites via JUnit and Mockito, **reducing post-deployment defects to near zero**.
- **Production Defect Resolution:** Led root-cause analysis for critical software bugs, collaborating with QA teams to deploy reliable hotfixes **within strict turnaround windows without service disruption**.

EDUCATION

Bachelor of Technology (B.Tech)— Computer Science and Engineering, 2017 – 2021 | Hyderabad

Malla Reddy Institute of Technology and sciences, JNTUH

CGPA: 7.41/10

Intermediate — M.P.C, Narayana Junior College 2015 – 2017 | Hyderabad

96.4%

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Cloud & AWS: AWS CloudWatch, Amazon SQS, Amazon S3, AWS IAM, AWS CodeBuild, AWS CodePipeline, Amazon EC2, AWS Lambda, Amazon ECS/EKS, API Gateway

DevOps & CI/CD: Jenkins, Docker, Kubernetes/EKS, Maven, Git, CI/CD pipelines

Engineering: Parallel Processing, Asynchronous Communication, Performance Optimisation, Database Indexing, Query Optimisation, Distributed Systems

Databases: DynamoDB, PostgreSQL, MySQL, MongoDB

Backend: Spring Boot, Spring Framework, Spring Data JPA, Hibernate, REST APIs, Micro services, Spring Security, JWT, gRPC

Frontend: React, JavaScript

Search & Messaging: Elastic search, Amazon SQS, Kafka

Testing: JUnit, Mockito, Unit Testing, Integration Testing, Test-Driven Development (TDD)

CERTIFICATES

HackerRank SQL (Advanced)

Microsoft Azure AI Essentials Professional Certificate by Microsoft and LinkedIn

Microsoft Azure Essentials by Microsoft Press

AWS Cloud Quest: Cloud Practitioner - Training Badge

JPMorganChase - Software Engineering Job Simulation

LANGUAGES

- Telugu
- English
- Hindi

ADDITIONAL TECHNICAL KNOWLEDGE

Cloud: AWS architecture and services, EC2, Lambda, ECS/EKS, API Gateway
Distributed Systems: Micro services architecture, asynchronous processing, gRPC, parallel processing, service-to-service communication
Additional Learning: Kafka, React, JavaScript, Python, modern cloud and container technologies
